
DESIGN, DEVELOPMENT
AND IMPLEMENTATION
OF REAL-TIME SYSTEMS

Scientific Editors

Leszek Trybus
Marcin W. Mastalerz

Conferences organized by
Polish Information Processing Society:

VIII edition of the Congress of Young IT Scientists

**XV edition of the Polish Conference
on Software Engineering**

XX edition of Real Time Systems

were supported
by the **Ministry of Science and Higher Education**
within the program related to the implementation
of tasks of science dissemination
(Decision No 1064/P-DUN/2013 on 24/07/2013)

POLISH INFORMATION PROCESSING SOCIETY

DESIGN, DEVELOPMENT
AND IMPLEMENTATION
OF REAL-TIME SYSTEMS

Scientific Editors

Leszek Trybus
Marcin W. Mastalerz

Warsaw 2013

The Polish Information Processing Society Scientific Council

prof. dr hab. Zdzisław Szyjewski – *Chairman*

dr hab. prof. PW Zygmunt Mazur – *Vice-Chairman*

dr hab. inż. prof. PG Cezary Orłowski – *Vice-Chairman*

dr hab. inż. prof. US Kesra Nermend - *Amanuensis*

prof. dr hab Leon Bobrowski

prof. dr hab. Janusz Górski

prof. dr hab. Zbigniew Huzar

prof. dr hab. Marian Noga

prof. dr hab. Ryszard Tadeusiewicz

prof. dr hab. Leszek Trybus

prof. dr hab. Krzysztof Zieliński

dr hab. prof. PS Wojciech Olejniczak

dr hab. inż. Lech Madeyski

dr Adrian Kapczyński

dr inż. Marek Valenta

Reviewers

*dr inż. Tomasz Babczyński, prof. dr hab. inż. Zbigniew Banaszak,
dr Piotr Czapiewski, dr inż. Włodzimierz Dąbrowski, dr inż. Grzegorz Dec,
dr hab. inż. Sebastian Deorowicz, dr inż. Zbigniew Fryźlewicz, dr inż. Piotr Gaj,
prof. dr hab. inż. Adam Grzech, prof. dr hab. inż. Zbigniew Huzar,
prof. dr hab. inż. Jacek Kitowski, prof. dr hab. inż. Jan Maciej Kościelny,
prof. dr hab. inż. Antoni Ligęza, prof. dr hab. inż. Edward Nawarecki,
prof. dr hab. inż., Krzysztof Sacha, dr inż. Jan Sadolewski, dr inż. Sławomir Samolej,
dr inż. Andrzej Stasiak, dr hab. Marcin Szpyrka,
prof. dr hab. inż. Ryszard Tadeusiewicz, dr hab. inż. Andrzej Turnau,
prof. dr hab. inż. Cezary Zieliński*

Scientific Editors

prof. dr hab. Leszek Trybus, dr inż. Marcin W. Mastalerz

Authors

Krzysztof Marcin Brzuszek¹, Przemysław Stpiczyński^{1,2} – CHAPTER 1

¹Maria Curie-Skłodowska University (Poland), Faculty of Mathematics, Physics and Computer Science

² Polish Academy of Sciences (Poland), Institute of Theoretical and Applied Informatics

Janusz Górski, Alan Turower – CHAPTER 2

Gdańsk University of Technology (Poland), Faculty of Electronics, Telecommunications and Informatics

***Marcin Jamro, Dariusz Rzońca, Jan Sadolewski, Andrzej Stec, Zbigniew Świder,
Bartosz Trybus, Leszek Trybus – Chapter 3***

Rzeszów University of Technology (Poland), Faculty of Electrical and Computer Engineering

Krzysztof Kogut – CHAPTER 4

AGH University of Science and Technology (Poland), Faculty of Electrical Engineering, Automatics, Computer Science and Biomedical Engineering

Krzysztof Kolek – CHAPTER 5

AGH University of Science and Technology (Poland), Faculty of Electrical Engineering, Automatics, Computer Science and Biomedical Engineering

Ryszard Kowalik¹, Denis Kobler² – CHAPTER 6

¹Warsaw University of Technology (Poland), Faculty of Electrical, ²Systems Europe Kraainem (Belgium)

***Ryszard Kowalik, Marcin Januszewski, Kamil Gontarz, Desire Rasolomampionona,
Emil Bartosiewicz – Chapter 7***

Warsaw University of Technology (Poland), Faculty of Electrical

Jerzy Martyna – CHAPTER 8

Jagiellonian University (Poland), Faculty of Mathematics and Computer Science

Marcin Piątek, Andrzej Turnau – CHAPTER 9

AGH – University of Science and Technology (Poland), Faculty of Electrical Engineering, Automatics, Computer Science and Biomedical Engineering

Michał Probstko¹, Krzysztof Bielawski² – CHAPTER 10

¹Intratel Sp. z o.o. (Poland), ²Białystok University of Technology (Poland)

Przemysław Gorczyca, Dawid Knapik, Krzysztof Kołek, Maciej Rosół – CHAPTER 11

AGH University of Science and Technology (Poland), Faculty of Electrical Engineering, Automatics, Computer Science and Bio-medical Engineering

Andrzej Stasiak, Łukasz Laszko, Zbigniew Zieliński – CHAPTER 12

Military University of Technology (Poland), Cybernetics Faculty

Kamil Szczygieł¹, Krzysztof Bielawski² – CHAPTER 13

¹Intratel Sp. z o.o. (Poland), ²Białystok University of Technology (Poland)

Bożena Woźna-Szcześniak, Agnieszka M. Zbrzezny, Andrzej Zbrzezny – CHAPTER 14

Jan Długosz University (Poland), Institute of Mathematics and Computer Science

Wojciech Zwonarz – CHAPTER 15

AGH University of Science and Technology (Poland), Faculty of Electrical Engineering, Automatics, Computer Science and Bio-medical Engineering

Technical Editor

Edition: I. Copies: 200. Publishing sheets: 9,6. Print sheets: 12,0.
Publisher, print and binding: PPH ZAPOL, al. Piastów 42, 71-062 Szczecin

Contents

Foreword	13
Chapter 1 Dense Matrix-Vector and Matrix-Matrix Multiplication on GPU Clusters	15
1.1. Introduction	15
1.2. Graphics Processing Units and GPU Clusters.....	16
1.3. Algorithms.....	18
1.4. Results of experiments	20
Conclusions	26
Bibliography.....	26
Chapter 2 Assessing the time effectiveness of trust management in fully synchronised wireless sensor networks	31
2.1. Introduction	31
2.2. Related works	32
2.3. Sleep scheduling in WSN.....	33
2.4. The case study	34
2.5. Simulation experiments.....	37
2.6. Simulation results	38
Summary	40
Bibliography.....	41
Chapter 3 Current functionalities of CPDev programming environment	43
3.1. Introduction	43
3.2. CPDev environment currently.....	44
3.3. FPGA-PLC controller prototype	45
3.4. CPVis visualization tool.....	47

3.5. Testing POU's with CPTest.....	48
3.6. SysML models in CPDev	50
Conclusions	52
Bibliography.....	52
Chapter 4 Real-time MR damper control strategies for quarter car suspension.....	55
4.1. Introduction	55
4.2. Mathematical model of SAS	56
4.3. MR Damper control strategies for the SAS system.....	59
Conclusion.....	63
Bibliography.....	63
Chapter 5 Development of C-language real-time controller for Android OS	67
5.1. Introduction	67
5.2. Linux and real-time	69
5.3. Experiments with inverted pendulum model.....	72
Conclusions	75
Bibliography.....	76
Chapter 6 Expert Fault Analysis System for power transmission/distribution networks	79
6.1. Introduction	79
6.2. Situation today.....	80
6.3. Data collection, conversion and validation.....	81
6.4. Data synchronization.....	84
6.5. From overview to detailed analysis.....	85
6.6. Use case – data synchronization.....	86
6.7. Contribution to real-time asset management.....	89
Conclusions	90
Bibliography.....	91
Chapter 7 Power system protection devices remote control.....	93
7.1. Introduction	93

7.2. Example 1 - data exchange system applied for protection devices of XX century's last decade	94
7.3. Concentrator programs allowing remote control of protection devices	100
Conclusions	103
Bibliography.....	103
Chapter 8 Designing a Schedulability Envelope for Radar Tasks Using the LS-SVM Method	107
8.1. Introduction	107
8.2. Radar Tasks Scheduling	109
8.3. Designing a Schedulability Envelope for Radar Tasks Using the LS- SVM Method.....	111
8.4. Online Radar Task Scheduler.....	114
8.5. Simulation Results.....	115
Conclusion.....	118
Bibliography.....	119
Chapter 9 Gait control algorithms for a six-legged walking robot based on oscillators.....	121
9.1. Introduction	121
9.2. Hexpod gaits.....	123
9.3. Control algorithm based on the linear oscillators.....	124
9.4. Control algorithms with nonlinear oscillators	125
9.5. Algorithms implementation.....	127
Conclusion.....	129
Bibliography.....	130
Chapter 10 Automated virtual machine system preparation using template contextualization.....	131
10.1. Introduction	131
10.2. Native Windows contextualization using Windows Sysprep tool	133
10.3. Contextualization using system service	134
10.4. Proof of concept	141
Conclusions	142

Bibliography	143
Chapter 11 Rapid development of real-time applications for ARM Cortex A9	145
11.1. Introduction	145
11.2. Functions used to obtain the time determinism	146
11.3. Rapid code generation	148
11.4. Experiments with the laboratory unstable mobile vehicle (UMV)....	150
Conclusions	154
Bibliography	154
Chapter 12 An approach to computer aided deployment of a complex critical system.....	157
12.1. Introduction	157
12.2. Context of the approach to performing complex deployment	158
12.3. The scope of the proposed approach	159
12.4. Stages, workflows and organization.....	160
12.5. Approach peculiarity	162
12.6. Characteristics of a sample complex deployment	163
Conclusions	165
Bibliography.....	166
Chapter 13 Controlling KVM virtual machine guest with VirtIO	169
13.1. Introduction	169
13.2. Agent architecture as a solution	171
13.3. The principle of operation	173
13.4. Examples of use.....	175
Conclusions	178
Bibliography.....	179
Chapter 14 SAT-based Bounded Model Checking for Metric Temporal Logic and Simply-timed Systems	181
14.1. Introduction	181
14.2. Preliminaries.....	182
14.3. Bounded Model Checking for MTL.....	185

14.4. The bridge-crossing problem	187
Conclusions	189
Bibliography.....	190
Chapter 15 Trajectory Planning and Path Tracking in Real Time.....	191
15.1. Introduction	191
15.2. Target robotic system	192
15.3. IRp-6 robot kinematics.....	193
15.4. Polynomial interpolation of the rectilinear trajectory	194
15.5. Experiments carried on the real robot	198
Conclusions	199
Bibliography.....	200
